

DECORATE-TO-INNOVATE™

1. Where do people do their best thinking?
2. How does environment and space impact creativity and innovation?
3. Where are people when they think of their most creative and innovative ideas?
4. Who works in environments or spaces that inspire creativity and innovation?
5. What characteristics, elements or resources from other people's environments might be applied in your spaces?
6. What might be changed or improved in the current environments and spaces to inspire more creativity and innovation?
7. How would you describe the ideal personal environment that might inspire people be highly creative or innovative?
8. How would people describe the ideal environment that inspires collaboration and teamwork to produce more creativity and innovation?

QUOTEMPLATE-TO-DECORATE™

"If you want people to think outside the box,
don't put their brains in a box."

—Gerald "Solutionman" Haman

"Many people experience cubicle creativity,
where the size of their ideas is proportional to
the amount of space in which they feel they
have to think."

—Gerald "Solutionman" Haman

"If your feet are comfortable, your brain is
comfortable."

—Gerald "Solutionman" Haman

"Environment designers should focus on the 5Ps
of Space Design: Public, Partner, Personal, PC
and Portable Spaces."

—Gerald "Solutionman" Haman
